Application for
2010 NSF Summer Program at Essex County College for High School Students

With a grant from the National Science Foundation (NSF) and the support of the High School Initiative Program at Essex County College (ECC), we are offering this summer program to high school students (Juniors and Seniors) who plan on majoring in the areas of Science, Technology, Engineering, and Mathematics (STEM) in ECC. The NSF Summer Program gives eligible students the opportunity to take a college-level mathematics course in addition to an introductory engineering course, both tuition- and textbook-free. These courses offer a great way for motivated high school students to get acclimated to the college experience and earn college credits while doing so.

If a student is selected to this program, the student is expected to follow the rules in ECC, and attend all the lectures and give his/her best effort to pass the courses.

Student's Name: _____

Grade (check one): __11th __12th Phone: _____

Student's Email: _____

Interested Majors: _____

When do you plan to enroll in ECC for your college degree? _____

Have you applied for the admission to ECC yet? _____

If you have applied for the admission to ECC, have you received admission yet? ____

Other Interested Colleges: _____
